

Cookie Policy

Cookies

To make this site work properly, we sometimes place small data files called cookies on your device. Most big websites do this too.

What are cookies?

A cookie is a small text file that a website saves on your computer or mobile device when you visit the site. It enables the website to remember your actions and preferences (such as login, language, font size and other display preferences) over a period of time, so you don't have to keep re-entering them whenever you come back to the site or browse from one page to another.

How do we use cookies?

Adjust this part of the page according to your needs. Explain which cookies you use in plain, jargon-free language. In particular:

- *their purpose is to remember users' actions, to identify the user, for online behavioural advertising*
- *they are essential for the website*
- *the cookies used are third-party permanent, belonging to the advertisers*
- *the advertisers and affiliate networks control and access the cookie-related information (third party)*
- *the cookies will not be used for any purpose other than the ones stated*

Enabling these cookies is essential for the website to work properly and it will provide you with a better browsing experience. You can delete or block these cookies, but if you do that some features of this site will not work as intended.

The cookie-related information is not used to identify you personally and the pattern data is fully under our control. These cookies are not used for any purpose other than those described here.

How to control cookies

You can control and/or delete cookies as you wish – for details, see aboutcookies.org. You can delete all cookies that are already on your computer and you can set most browsers to prevent them from being placed. If you do this, however, you may have to manually adjust some preferences every time you visit a site and some services and functionalities may not work.
